Notebook notes - pilot (3 pages)

Drawn by the app itself (Claude-written code), not by an image AI.

- Cost: $0 per page. No API calls, no images to download.
- App size: + about 0.9 MB (Kalam handwriting font, free OFL licence).
- Text: exactly your notes, word for word - nothing invented.
  (The OpenAI pilot invented content and cost much more.)
- Bold terms stay bold; headings get a yellow highlighter.
- Each heading becomes a numbered, coloured box.
- Tables are drawn by hand-style borders.
- One small doodle per topic (here: solar system, bank, chair
  + ballot box). If approved, I draw one for each of the 927 topics.
- Works offline and in dark mode; text stays searchable.

In the app it would be a third view next to
'MCQ notes' and 'Full notes': 'Notebook'.

Pages in this pilot:

1. Universe and solar system (Geography)
2. Basel accords (Economy)
3. Vice-President: office & election (Polity)

If you are OK with this look, I will roll it out to all pages.
Tell me what to change (colours, font size, doodles) first.

Universe and solar system — basics, ages and distance units

The universe and the solar system - origin theories, the Sun, planets, asteroids, comets, meteors

1 I. Basics

- The **Solar System** is **centred** on the **Sun** — **4.6 billion years old** (age of Earth and solar system **~4.6 billion years**)
- **Main components:** The **Sun**, **eight planets**, **dwarf planets**, **satellites**, **asteroids**, **comets**, **meteoroids** and **cosmic dust**
- **Gravity keeps bodies** in **orbit**
- **Number of planets: Current — eight; former — nine, before Pluto's reclassification**
  - **Pluto reclassified** as a **dwarf planet** in **2006** by the **IAU**

2 2. Definitions and ages

- **Cosmology:** Study of the origin, evolution and structure of the universe
- **Standard Model of cosmology:** Big Bang + dark matter + dark energy + CMB
- **Age of the universe: 13.8 billion years** (APPSC 2019)
- **Most abundant element: hydrogen**, then helium (universe and the Sun)
  - Sun = **~74% H and ~24% He**
- **Present view:** All planets formed from the **same spinning protoplanetary disc** as the Sun
  - Hot inner disc → only metals and rocky minerals solid (Mercury to Mars)
  - Cool outer disc → water, ammonia and methane ices (giant planets)

3 3. Distance units

- **Units: AU** = mean Earth-Sun distance **~149.6 million km** < **light year** (distance light travels in a year) **~9.46 x 10^12 km** (~9.46 trillion km) < **parsec** = **3.26 light years**
- ⚠ Order of size: **AU < light year < parsec**

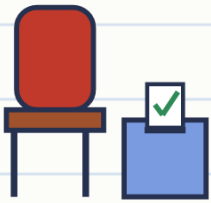

Basel accords

Banking sector reforms – Narasimham Committee I and II, Basel norms, bank mergers, privatisation debate

Accord	Year	Core content
Basel I	**1988**	*Credit risk only;* **8% of risk-weighted assets**
Basel II	**2004**	*Three pillars: minimum capital, supervisory review, market discipline*
Basel III	**2010**; *India* **1 Jan 2013**	*CETI, buffers,* **leverage ratio, LCR, NSFR**

Vice-President: office & election

Vice-President; Prime Minister and the Union Council of Ministers - Articles 74, 75, 77, 78

- All executive action of the Government of India is taken in the President's name (Art. 77)
- **Art. 63**; modelled on **American** VP; ex-officio **RS Chairman** (**Art. 64**), casting vote only
- Elected by **all MPs, elected and nominated**; State legislatures **no role** (**Art. 66**)
- PR-STV, secret ballot; disputes: **Supreme Court** (Art. 71)
- Qualified for **Rajya Sabha**, **35** years; term **5 years** (Art. 67)
- Removal: **RS resolution** by majority of all then members + LS agrees; **14** days' notice
- Acting President (**Art. 65**): max **6 months**; draws President's salary
